Manual Tape Dispenser PROFI 161-21402

Professional Manual Dispenser 161-21402 For adhesive packing tapes up to 50 mm

This professional manual device may be in a different package, however, it is in fact the well tested 161-21402. We negotiated to receive a world-wide, exclusive contract with the manufacturer of this device. Since 2013, Volz also holds the exclusive global distributing rights. The packaging is neutral in order for the product to be effectively marketed by multiple dealers.

This professional manual tape dispenser is used for the sealing of cartons and packages. With its roller brake it is especially suitable for easy tape dispensing. Two contact pressures allow for an extremely simple and smooth tape application. The tape cut-off is implemented by activating the release inside the handle, thus protecting the user from injuries. Tapes of 76 mm (3 inch) core diameter, with up to 50 mm in width and a length of 200 m may be processed. The maximum roll diameter is 170 mm.

We have created a special website for this product. More information regarding this article may be found at:
