### Professional Manual Dispenser 161-21402
### For adhesive packing tapes up to 50 mm

This professional manual device may be in a different package, however, it is in fact the well tested 161-21402. We negotiated and received an exclusive global contract with the manufacturer of this device. Since 2013, Volz also holds the exclusive global distributing rights. The packaging is neutral allowing the product to be effectively marketed by multiple dealers.

This professional manual tape dispenser is used for the sealing of cartons and packages. With its roller brake it makes tape dispensing especially easy. Two contact pressure rolls allow for an extremely simple and smooth tape application. The tape cut-off is implemented by activating the release inside the handle, thus protecting the user from injuries. Tapes of 76 mm (3 inch) core diameter, with up to 50 mm in width and a length of 200 m may be processed. The maximum roll diameter is 170 mm.

We have created a special website for this product. More information regarding this article may be found at: **www.tapedispenser.de**
